

DT-5043(3rd) USB2.0 Extension Cable 30M

Please read the product manual carefully before using the product.

I. Product Overview

Designed with the Taiwanese original FE1.1 4-channel multi-thread chip solution, this cable extends a computer's USB port up to 20 meters away. It complies with the USB 2.0 standard and is backward compatible with USB 1.1, supporting a data transfer rate of up to 480 Mbps. It works with high-speed, full-speed, and low-speed USB devices, including high-capacity storage devices and external hard drives. Plug-and-play, no driver installation required.

II. Test Report

Test Device	Test Result
JinSheng 32GB Solid State Drive	Data Read: 30MB/s
8GB USB 2.0 Flash Drive	Data Read: 20MB/s
USB Wireless Network Adapter	Works normally
USB Mouse	Works normally
USB Keyboard	Works normally
USB Webcam	Clear image display

III. Detailed Specifications

(1) Built-in signal "equalizer" chipset with high performance and low power consumption. The cable body features high flexibility and high break resistance. It boosts the signal in the USB active extension cable to prevent data loss.

(2) Supports up to 127 types of USB devices with a transfer rate of 480 Mbps, backward compatible with USB 1.1.

(3) Supports high-speed, full-speed, and low-speed devices.

(4) Plug-and-play, no driver required. Supports simultaneous connection of multiple USB 2.0 devices.
